

Lorraine May Sawicki

DATA VISUALIZATION & PRODUCT DESIGNER

lorraine.sawicki@gmail.com | 862.849.7167

EXPERIENCE

PRODUCT DESIGNER | **PLANTIFERATE** October 2017 - Present

Working with the founder of startup on everything from business development to user experience workflows; style guides and user interface

- Employed iterative design process to create paper and Sketch prototypes
- Designed surveys and user personas
- Conducted research to identify business goals and inform research goals
- As sole UX researcher and designer on project, collaborated with founder on visual design possibilities and business direction

UX INSTRUCTOR | **SCHOOL OF VISUAL CONCEPTS** Feb/Mar 2018

Part-time UX Design Instructor teaching assistant, over 6 weeks and 24 hours of in-person classroom time will help teach the fundamentals of Sketch and InVision to students enrolled in a comprehensive UX Design program.

FOUNDER | **CALYXIA** 2011- Present

Freelance UX and web designer.

DATA JOURNALIST | **SEATTLE TRANSPLANT** 2017-Present

Personal project to explore insights, data and memories to celebrate and muse on the 10 years that I've lived in Seattle, WA.

WEB/UX DESIGNER | **PCC COMMUNITY MARKETS** 2013 - May 2016

Designed and managed web and email communications for grocery store co-op local to Seattle area

- Heavy involvement with web content management and updates
- Designed, implemented and managed email marketing campaigns
- Technical and design lead for planning, wireframing and prototyping responsive website prototype
- Designer of Taste magazine's website presence and photography selection

SOFTWARE DEVELOPER | **MOLI**

Moli.com was a social networking startup geared toward the creative class. Contributed front-end code for a custom PHP framework.

FRONT-END WEB DEVELOPER | **BROOKLYN MUSEUM**

Streamlined the online editorial process with custom front-end coding. Worked with the head of IT to build a presence on social networking platforms.

OPEN IDEO

SOFTWARE ENGINEER | [FORBES.COM](#)

Lead full-stack developer for ForbesAutos.com, a luxury car portal. Implemented the backend with Java, and worked closely with a senior designer to transform creative vision into web pages with a streamlined backend.

AUTOMATION ENGINEER | [LIQUIDNET](#)

Tested, documented, installed, and designed custom tools in C++ and Java for quality control tests at a financial startup. Documented the database schema and all messages used in the system. Gained experience in the software development cycle and the finance industry.

LINUX INSTRUCTOR | [BMCC \(Borough Manhattan Community College\)](#)

Worked with under- and unemployed New York City professionals that wanted to gain career traction in the tech industry by learning Linux. Taught a wide range of topics including basic UNIX, TCP/IP, Linux kernel concepts, the history of UNIX and application of the operating system for business.
